

Software Support for The Medical Manager®

High-Quality Service from Senior Technicians

You Have Options

Users of The Medical Manager® have options when it comes to sourcing software support and a claims clearinghouse. Our team of senior technicians has worked with The Medical Manager and a variety of EDI vendors since the early eighties. We are the partner of choice for thousands of providers nationwide who want a more immediate, higher- quality and personalized approach to issue resolution.

Getting More for Less

Practices of all sizes, medical specialties and locations count on us to deliver quick response times, quality customer service and go-forward guidance on governmental mandates – all for at least 20% less than what they pay to a corporate call center. In addition, our clients can enroll with an innovative online clearinghouse that reduces the administrative billing burden so both payer and patient payments arrive faster.

Getting Started

To start the process for transitioning your support services, call us at 800.781.1044 or email Sales@HarmonyHIT.com.

Interfacing The Medical Manager to a Best-of-Breed EHR

Don't jeopardize cash flow by replacing The Medical Manager with an electronic health record that doesn't have an equally strong financial system behind it. There are many fully certified EHRs that seamlessly interface with The Medical Manager so you can protect your investment and safeguard cash flow. We can suggest which EHR to evaluate based on your medical specialty and technical preferences. We can also assist with the interface, system setup, project management and putting processes in place to help you achieve meaningful use.

What Makes Us Different?

Relationships. Responsiveness. Results.

Our experience.

We're a group of information technology strategists and technical support analysts that have delivered healthcare IT since the early eighties. We know the ropes.

Our perspective.

We've seen, first-hand, how corporate mergers and acquisitions in health IT has de-personalized software support. We personalize it.

Our commitment.

When it comes to technical support, a case number never replaces a first name and a call back is no substitute for immediate issue resolution.

Our focus.

If it relates to the technical infrastructure of your practice we'll tackle it. We specialize in supporting medical information technology.
